### DETAILED ACTION

1. Claims 9-12 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention. Election was made **without** traverse in the reply filed on 8-16-04.
2. It is requested that applicant cancel non-elected claims 9-12 in response to this action to facilitate the issue process if the application is ultimately allowed.
3. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: assembly 68 (page 5). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.
4. The disclosure is objected to because of the following informalities: reference to the relied upon parent application and current status should be included at the beginning of page 1 of the instant specification.  
  
Appropriate correction is required.

5. Claims 6-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Re claim 6, lines 4-5 are somewhat confusing as it is not clear if the upper and lower cables are part of the recited "pair of cables". As best understood, the comma in line 4 could be replaced with —including—to clarify the claim in this regard.

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

7. Claims 1-8 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-8 of U.S. Patent No. 6,623,223. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant claims merely remove a feature of the patented claims and encompass the complete scope of the patented claims. Allowance of the instant claims 1-8 would provide applicant an unfair extension of monopoly for the portion of overlapping coverage with the patent claims.

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

9. Claim 1 is rejected under 35 U.S.C. 102(a) as being anticipated by Zaerr et al.

Zaerr et al teaches a hinged deck arrangement defining a pivotable segment 107 (see figure 3), a stationary deck segment, a pivot hinge 152+, a support assembly as broadly claimed, and a pivot assembly 160+.

It should be noted that the raised position of Zaerr et al (figure 3) is considered “substantially” horizontal as broadly claimed. Moreover, the pivotable segment is pivotable to a range of positions via the cable system 160+ including positions just above horizontal. Such positions would clearly read on a “substantially horizontal raised position” as broadly claimed.
